

The diagram shows a symmetrical bone, likely a scapula, with a central shaft and two rounded ends. A solid magenta line outlines the bone's shape. Inside, dashed blue lines define two circular regions, one on each end. Each circular region is divided by a solid blue crosshair. The left circular region is labeled 'Rückseite' (back) and the right 'Vorderseite' (front). Each crosshair has a label 'Mitte' (middle) near its center. A vertical dashed line runs through the center of the bone, connecting the two circular regions.
